

THE ROCK

TRUE FIDELITY STANDS THE TEST OF TIME...

THE ROCK

YEARS IN THE MAKING...

Unity Audio has been distributing monitors since 1995, and we've seen and heard it all over the years. Now we've used that expertise to design and manufacture our own unique range from the ground up...

...a range of monitors that really delivers – where others don't.

FRONT Baffle & Cabinet BY STUDIO DESIGNER KEVIN VAN GREEN

To add density, mass and rigidity to the design, the front baffle is manufactured from Corian and then bonded to a plywood baffle. Closed cabinet design for a more accurate smoother, deeper bass response made from top grade 12mm, 9 ply Baltic Birch rather than cheaper commonly used MDF. Unique cabinet bracing system to stop cabinet flexing.

SUPERIOR FOLDED RIBBON TWEETER

A new folded ribbon tweeter has been designed which features a new neodymium magnet system, giving higher efficiency, superior linear frequency and phase response along with smoother, less fatiguing results. The frequency response of the tweeters can go as high as 50 kHz, which is how our tweeters superior phase response is achieved.

WOOFER

An 180mm woofer with a 0.2mm aluminium foil is chemically bonded to a rigid pulp fiber cone. This eliminates harmonic anomalies and permits +/- 15mm of woofer travel producing accurate low bass frequencies. This construction ensures that the woofer cone will remain symmetrical at all frequencies, producing a long life for the woofer element and full accuracy of the driver through it's life.

CUSTOM DISCRETE AMPLIFICATION BY ESOTERIC AUDIO RESEARCH (EAR)

The best amplifier Guru in the business, TIM DE PARAVICINI has designed a true 100 watt discrete bi-polar low feedback amplifier with custom wound transformers and dedicated LF & HF sections with overload/clip protection, resulting in a very fast and clean, and astoundingly accurate reproduction.

THE ROCK FIRST OF AN EXCITING
NEW RANGE OF MONITORS BY
