

LISSON GROVE AR-1 TUBE COMPRESSOR

The **Lisson Grove AR-1** is a vintage style tube compressor based on the classic Altec compressor that was used intensively in the '60's.

However, the AR-1 has some modifications. Some of which are in the circuit and some functional. The quality of each component in the units is of the highest possible standard, and the unit is hand built from top to bottom in the UK using NOS Mullard and RCA tubes along with Sowter and Cinemag transformers.

The Lisson Grove AR-1 has been built from a love of the sound of a bygone era . We hope you recognize that very familiar sound.

Producer Michael Brauer AR-1 Video

"Today I put the AR-1 on the vocal, yesterday I put it on the acoustic and the day before I put it on the bass. If i'm gonna spend good money on a compressor it can't be a one trick pony. There's a few ponies running around in this baby."

Michael Brauer - Producer

Credits include: Bob Dylan, Rolling Stones, Coldplay, The Vaccines, Shakira, Doves

"The Lisson Grove tube compressor is like a glimpse into the toolkit of English recording engineers working circa 1960. It's not perfect, it's not pristine and it's not like any other compressor. It sounds distinctive and is one of my favorite compressors of all time."

Barry Rudolph is an L.A.-based recording engineer.
