Andy Gray adds B.A.B.E to Boulder MkII's.

"The best speaker in the world just got louder"

Andy Gray

Composer, producer, remixer Andy Gray has recently added the new **Unity Audio B.A.B.E** (Boulder Active Bass Extender) to his existing Boulder MKII 3 way monitors, transforming them into a 4 way fully active main monitoring system.

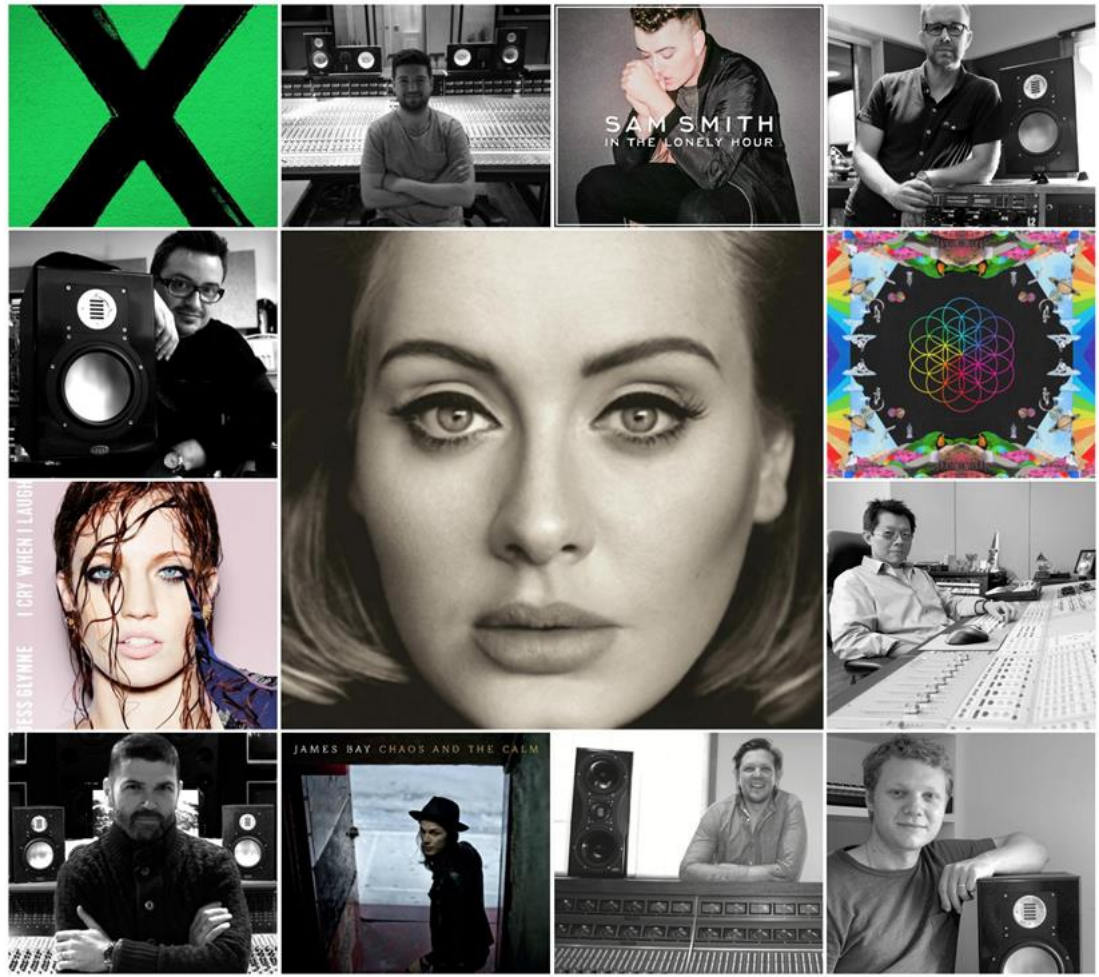

Andy also added the new Super Rocks for the rear surround channels. Andy had this to say about our new 2 way addition.

"The Super Rocks massive low end is too good for just a rear set of speakers, but I need something that can keep up with the BABE Boulder Combo" It simply is a Super Rock.!

Andy's is currently working on the music score for a brand new Hollywood TV series due to air in April called 'Hunters' [https://en.wikipedia.org/wiki/Hunters_\(TV_series\)](https://en.wikipedia.org/wiki/Hunters_(TV_series))
